- Format for learner responses (written activity form, guidance for discussion)

### Detailed Facilitator Instructions

1. Provide access to audio clips or transcripts. Learners can listen to audio clips or read transcripts as a class or independently outside of class.
2. Ask learners to briefly describe the situation for Tamiya from each of the following perspectives:
  - a. Program context – What are the characteristics of the child care program? What are the attitudes and beliefs of the staff?
  - b. Family perspective – What are the values and experiences of the family?
  - c. What is your own perspective?
3. Provide feedback.

### Suggested Assessment

1. Program Context: The program has a set of transition procedures which the staff typically follows; however, the procedures seem flexible to change. They typically encourage two visits to the program – one for only the family to ask questions, and the second for both the child and family to visit the program. The staff doesn't usually go on home visits, but they seem open to considering making one for Tamiya. The staff wants to develop a strong relationship with the child and family. Tamiya's current physical therapist will continue to serve her at the new program. So she will be able to answer questions and be a familiar face for Tamiya.
2. Family perspective: The mother is concerned about the upcoming transition because Tamiya is a shy easily frightened child. She wants Tamiya to feel comfortable and be able to show her personality in this new setting, but is worried that won't happen. She would like the teacher to come for a home visit. She also thinks a slow phase-in schedule would be best for Tamiya.
