CONNECT Modules: FREE..ONLINE...CONNECT Professional Development Module on Embedded Interventions Now Available

The first in a series of CONNECT Modules is now available.

Pam Winton, Director of CONNECT

Are you an early childhood faculty member or PD provider? Looking for high quality PD resources focused on teaching about research-based practices? Wanting ways to build critical thinking skills in adults who serve young children? The first in a series of CONNECT Modules is now available. The first module, Embedded Interventions, focuses on research-based practices to help children participate in frequent and appropriate learning opportunities in natural environments and classroom settings.

CONNECT Modules guide learners through a 5-step learning cycle designed to build evidence-based practice decision-making skills. The modules are flexible in order to address individual learner needs and the variety of professional development contexts in which modules might be used. The module includes authentic dilemmas, video clip demonstrations of effective practices, multiple activities for learners, and facilitation tips for faculty and PD providers.

This module marks the culmination of the work of many persons and the CONNECT project would like to express gratitude to the dozens of persons and organizations whom contributed their time and energy in providing valuable input into making this module a reality. For more information about the Module, see the link below.

Module on Embedded Interventions

Hello From sunny California. Congratulations on a wonderful resource! I will use it with my professional development community and share with IHE colleagues. Great work!

CONNECT Module 1

Hi I'm Nicole and I am new to the early childhood community! I am an infant and toddler teacher and am interested in developmental therapy and working in early intervention. I was looking through your Module and browsed through the handouts. I found the environmental handout to be useful because it gave me new ideas for my classroom and it also had many examples of things I am already doing! I look forward to reading more about your practices and learning about the community.

CONNECT Module 1

Hi Nicole

Welcome to our community!! We are glad that CONNECT module has been useful to you in your work and that it also validates some of the things that you are already doing. Hope you will be able to explore the video clips too. We do have video clips that are focused on infants and toddlers that you may find useful.

CONNECT Module 1

I looked at the video titled "routine in a program-block play" and I found it very interesting and helpful. I will be interning at an inclusion school starting in the fall and using picture templates for block play is a great way to help children with their fine motor skills. I look forward to viewing more videos because they will be helpful for me and can be knowledge that I will bring to my internship.
