# Research

Handout 5.1

## Research Summary on Assistive Technology Interventions

A research synthesis reviewed 104 articles published from 1980 through 2004 on the use of assistive technology (AT) with infants and young children (Campbell, Milbourne, Dugan, & Wilcox, 2006). Of the 104 articles, 77 were descriptive studies or discussion-oriented articles about recommended AT practices and 23 reported the results of studies that focused on teaching children how to use AT. All of the studies focused on whether children could learn how to use AT rather than the effects of AT on children's learning and development.

### How were AT practices defined and implemented?

Most of the 23 studies focused on teaching children switch activation use (e.g., to activate computerized toys). A number of studies examined strategies to teach young children to use power mobility devices (e.g., motorized wheelchairs) and computers. Only one of the 23 studies reported on the effectiveness of teaching young children to use augmentative communication devices. Information about who facilitated children's use of AT was not provided in the review. Therefore, it is unclear whether teachers, family members, or researchers implemented the AT practices with children who participated in this research.

### What were the characteristics of the participants and settings?

Across all studies, the sample size ranged from 1-120 children. The infants and young children ranged in ages from 2.5 to 60 months and were reported as having cerebral palsy, severe multiple disabilities, physical disabilities, global developmental delays, mild mental retardation, speech and language delays, and Down syndrome. The review did not describe the characteristics of the settings in which children used AT.

### What were the key findings related to children's use of AT?

As a whole, the studies provided relatively strong evidence that children as young as 12 months with various types of disabilities and developmental delays could be taught to operate switches to activate toys and other devices. The results of studies examining children's use of augmentative communication, power mobility devices and computers were inconclusive due to insufficient research or problems with the research design. Across all studies and AT devices, the review found that the primary teaching strategy was providing opportunities for children to access the device and to practice using it, either alone or with minimal adult involvement.

### Bottom line

Research on AT has shown that even very young children with physical disabilities and developmental delays can learn how to use AT devices successfully. However, further research is needed to evaluate the intervention effectiveness of AT not just on performing isolated skills but for promoting children's successful participation and learning within the context of everyday activities.

# Policies

## Handout 5.4

### Policy Advisory The Law Concerning Assistive Technology Interventions

How does the law define assistive technology for young children with disabilities? How do children, their families, and professionals such as you access the technology?

#### Bottom Line

The best methods for making assistive technology available to young children and their families and educators derive from the law itself. Below are your roles and responsibilities to better understanding the law as it relates to assistive technology (AT).

- (1) Know how Congress defines assistive technology devices and services.
- (2) Learn which types of devices and services are represented under assistive technology.
- (3) Understand the immediate and long-term purposes of AT and how it can increase a child's functioning and learning.
- (4) Know that IDEA and Sec. 504 provide that assistive technology devices and services are reasonable accommodations (Sec. 504) or related services (IDEA).
- (5) Identify the name and functions of the state assistive technology agency.
- (6) Identify which professions and disciplines are most expert in assistive technology for each child you serve and who the local experts are.

#### Definitions

Depending on who you ask and what context you are in, there are different definitions used for assistive technology.

##### A Practical and Basic Definition

The definition used in the module is practical and basic, the sort of definition educators and other professionals are well justified in using:

*Assistive technology (AT) interventions involve a range of strategies to promote a child's access to learning opportunities, from making simple changes to the environment and materials to helping a child use special equipment. Combining AT with effective teaching promotes the child's participation in learning and relating to others.*

##### A Legal Definition

Second is the legal definition, the sort of definition that Congress uses in the [Technology-Related Assistance Act of 1988](#), as amended and commonly known as the "Tech Act" (29 U.S.C. Sec. 3000 et seq.), the [Individuals with Disabilities Education Act](#), and the [Rehabilitation Act](#).

Question

Step 3:  
Evidence

Step 4:  
Decision

Step 5:  
Evaluation

# Definition and Demonstration of the Practice

# Handouts

Handout 5.3

## Examples of Assistive Technology Adaptations

Adaptations for young children often involve modifications of existing toys, learning materials, or other everyday items. These adaptations can serve a wide variety of purposes so that children can participate in all types of learning opportunities. Below are some examples of adaptations for self-help, toys and play areas, communication and literacy, and mobility and positioning.

### 1. Self Help

A zipper pull makes dressing easier for a child. You can buy zipper pulls or make one using a key chain as seen here.

Non slip shelf liner can be used to stabilize objects, such as a plate or bowl during mealtime.

A child can use a bath mitt to more easily participate in bathing. Washing with a bath mitt could be easier than holding onto a wash cloth. Bath mitts can also be used to assist in grasping objects. Secure Velcro to the object and the bath mitts will cling to the Velcro making it easier for the child to pick up the object.

### 2. Toys & Play Areas

Confining toys to a box lid, hula hoop, or planter base keeps the toys within the child's reach and vision.

# Activities

**Activity 5.4a**

**Identify appropriate assistive technology equipment**

Name  Date

To complete this activity form electronically, remember to first save your file. If you need further assistance, see the [Help & FAQs on pdfs](#).

**Instructions**

Review [Handout 5.2: Examples of Assistive Technology Equipment](#). Then, answer the questions below about which types of assistive technology (AT) equipment each child might benefit from most.

1. Ronny is a nonverbal three-year-old boy. His mom has enrolled him in a family child care center, but she is worried Ronny will not be able to communicate with his teacher and other children at the center. Looking at [Handout 5.2](#), what type(s) of AT equipment could Ronny use to help him communicate?

2. Maria is a two-year-old girl who loves playing with dolls and stuffed animals. One of Maria's favorite toys is Dolly, which has a small button on its back that you push to make it talk. Maria has physical impairments and struggles with fine motor skills. It is difficult for her to push the small button. Looking at [Handout 5.2](#), what type of AT equipment could allow Maria to make Dolly talk?

3. Jaden is a four-year-old boy who cannot walk on his own. His teacher would like him to be able to participate more in the classroom, including in games such as [Red Light, Green Light](#). Looking at [Handout 5.2](#), what type of AT equipment could help Jaden participate more in class?

# Implementation Plan

Handout 5.6

## Sophie's Assistive Technology Plan

### Learning or Participation Goal

Sophie will make requests, express thoughts and share information with others throughout the day.

**What is currently happening?** Sophie has a few words, and uses some noises, and gestures to make requests. She gives hugs and is affectionate when she is happy and cries when she is upset. She generally does not interact with the other children at Ms. Mary's.

**What would you like to see happen?** The team would like Sophie to be able to make choices and requests during daily routines and activities, such as mealtime, playtime, outside time, story time, and bedtime. They would like Sophie to make comments about herself, others, and her environment.

### Ideas for Assistive Technology

#### 1. How can we change the environment?

Place picture boards throughout the home and at Ms. Mary's house.

#### 2. How can we change the activity?

Encourage siblings at home and peers at Ms. Mary's to model and use the communication boards with Sophie.

#### 3. How can we change the materials?

Holly and Ms. Mary will provide pictures of family members, peers, and some of Sophie's other "favorites" for use on her communication boards.

#### 4. What equipment can we provide?

Communication boards will be created for individual activities and routines (mealtime, outside time, story time, doll play, block play, arts & crafts, and bedtime). A general or "core" board will also be created. The boards will be in a binder for Sophie to carry.

#### 5. How can we change the schedule?

NA

#### 6. How can we adapt the instructions?

NA

### Teaching Strategies

**How will you support the child in using AT?** Holly and Ms. Mary will use **aided language stimulation** to model how to use the communication boards in as many opportunities as possible with Sophie. Initially, Holly and Ms. Mary can use hand-over-hand assistance to Sophie's finger and help her make a choice. Then that can fade to a more subtle pointing or to verbal cues as Sophie gains competence in using the boards to promote participation in natural settings. *Infants and Young Children, 21(2), 94-100.*

## Identify appropriate assistive technology equipment

### Objective(s)

Learners identify appropriate assistive technology (AT) equipment for children with disabilities.

### Description

In this activity, learners review examples of AT equipment and identify which items could be helpful for three children described in the activity.

### Required Materials/Resources

Learner Materials

- [Handout 5.2: Examples of Assistive Technology Equipment](#)

### Detailed Facilitator Instructions

1. Have learners review the handout.
2. Have learners answer the activity questions.
3. Provide Feedback

### Suggested Assessment

1. Augmentative communication devices (e.g., a picture or object communication board)
2. Switch adapted toys (e.g., use of a large switch to activate Dolly's talking)
3. Mobility devices (e.g., a scooter board or walker)

Hints provided to learner:

View Handout 5.1: Examples of Assistive Technology Equipment to find answers.

### Facilitation Tips

- Learners can respond in class, online, or using the PDF Form; which can be printed, emailed, or submitted online.
- Break into groups to discuss and respond.

### Alternate Version(s) (refers to different levels of difficulty)

- [Activity 5.4b: Find types of assistive technology equipment \(Structured Exercise\)](#)

## Aligning CONNECT Modules with OSEP Indicators and Outcomes

The state administrators in charge of early intervention services (Part C of IDEA) and preschool disabilities services (Part B Section 619 of IDEA) have certain reporting requirements to the US Department of Education – Office of Special Education Programs (OSEP).

Part C Early Intervention and Part B-Section 619 coordinators must demonstrate yearly progress in Annual Performance Reviews (APR) of their State Performance Plans (SPP) towards performance indicators in nine areas related to early childhood outcomes. Part C has 14 indicators and Part B has 20 indicators on the SPP/APR. All states must have an improvement plan which typically includes professional development activities.

The content, activities and resources of CONNECT Modules 1,2, 4, and 5 can be used by professional development providers to help states make progress towards the following **OSEP Indicators**: Part C Indicators =2, 3, 4, & 8. Part B Indicators=6, 7, 8, & 12. CONNECT Modules are free online resources for faculty and professional development providers. They can be found at <http://community.fpg.unc.edu/>

### Module 1: Embedded Interventions

#### Part C

**Indicator 2: Settings**

Percent of infants and toddlers with IFSPs who primarily receive early intervention services in the home or community-based settings.  
(20 U.S.C. 1416(a)(3)(A) and 1442)

**Indicator 3: Child Outcomes**

Percent of infants and toddlers with IFSPs who demonstrate improved:

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/communication); and
- C. Use of appropriate behaviors to meet their needs.

(20 U.S.C. 1416(a)(3)(A) and 1442)

**Indicator 4: Family Outcomes**

Percent of families participating in Part C who report that early intervention services have helped the family:

- A. Know their rights;
- B. Effectively communicate their children's needs; and
- C. Help their children develop and learn.

(20 U.S.C. 1416(a)(3)(A) and 1442)

# Ways that Modules are used to Enhance Inservice PD

*“I’d like to mention that the CONNECT resources and modules are incredibly valuable for those of us who provide statewide in-service training and technical assistance to practicing EI professionals. The 5-Step Learning Cycle/problem solving framework supports group application of content. We plan to use this same framework in our Children with Complex Needs Initiative trainings and online coursework in 2012-13.”*

- Heidi Wettlaufer ( Pennsylvania Technical Assistance Network)

# Ways that Modules are used to Enhance PD

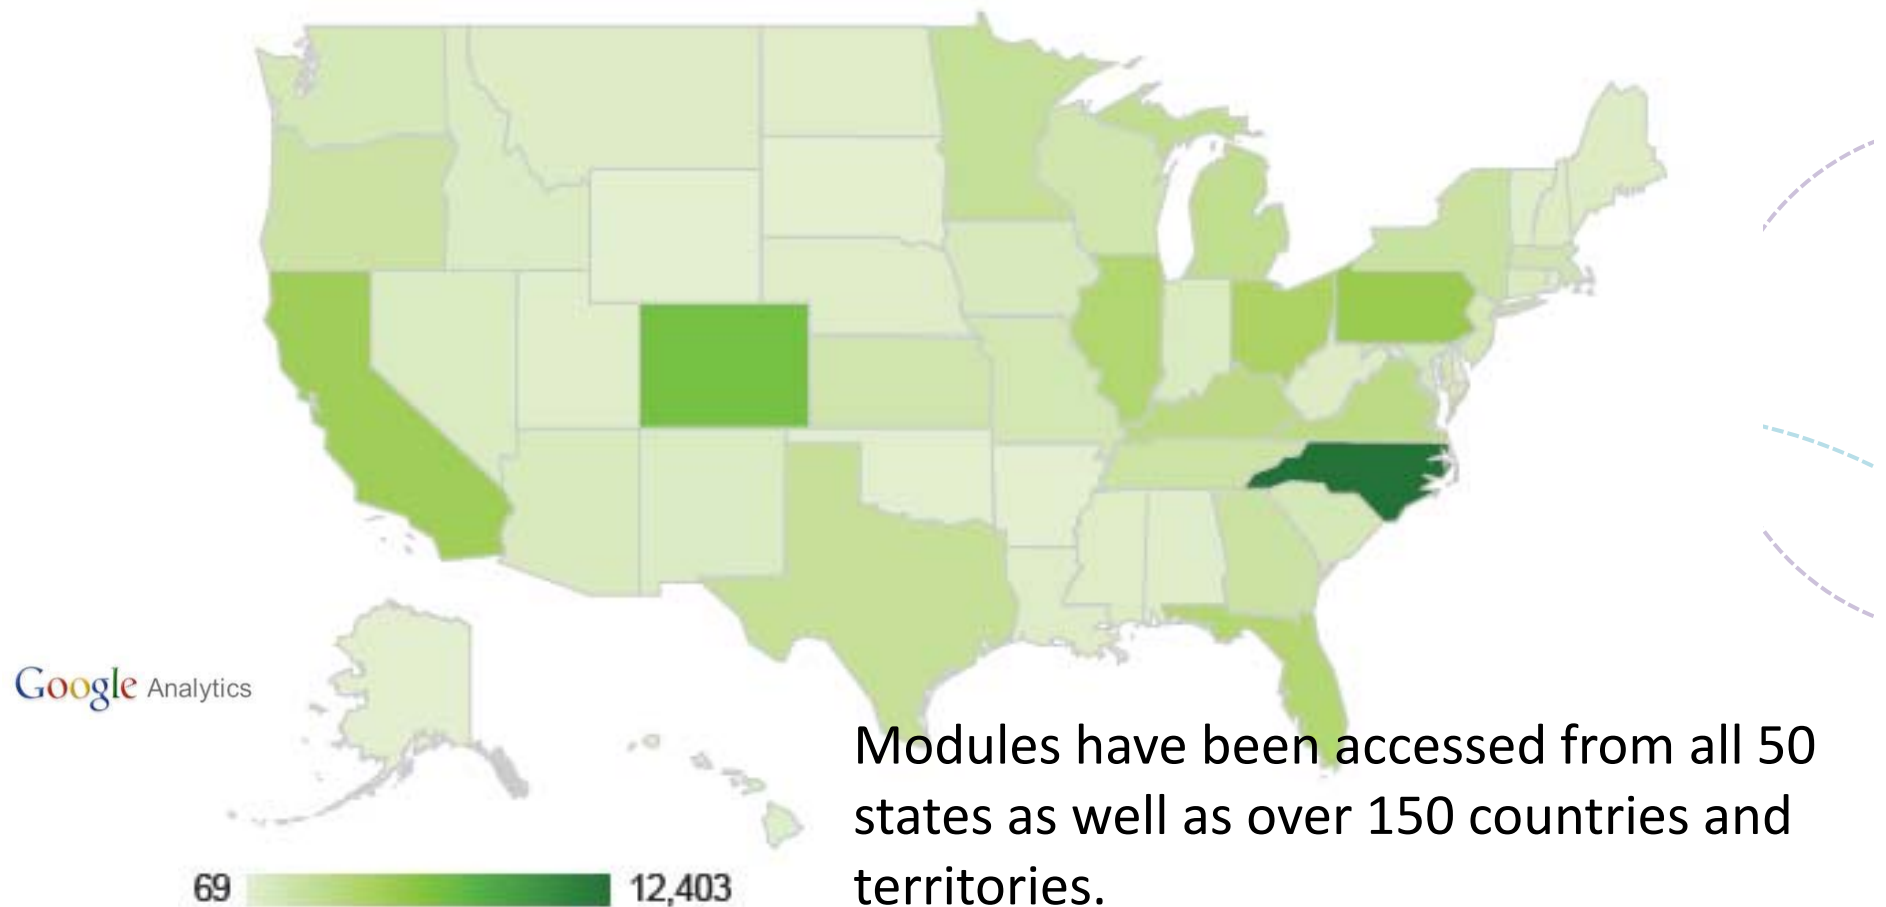

*“We have been discussing the possibility of standardizing the training around inclusion and serving children with special needs that is delivered through the CCR&R system, and we think the Connect modules that FPG has developed might be a good fit” – Jani Kozlowski (North Carolina Department of Health and Human Services)*

# Pair-Share

- How do you envision using these resources to change your teaching / courses / program of studies?
- How can you evaluate student / participant outcomes after using CONNECT modules?

# What We Learned: Our Reach

# What We Learned: Overview of Module Use (Fall 2010 – Spring 2012)

# Module Growth (Fall 2010 / Spring 2012)

Google Analytics

	Fall 2010	Spring 2012	Growth
Average time on site	9 min 3 s	13 min 48 s	52%

# Quality and Relevance of Modules

	Module 1	Module 2	Module 3	Module 4	Module 5
Quality	4.67	4.75	4.67	5.00	5.00
Relevance	4.60	4.75	4.67	4.60	4.50

\*Based on a scale of 1-5 where “5” is the highest possible rating

# Usefulness of Modules

Module resources were useful.

Resources / Assets	Mod 1	Mod 2	Mod 3	Mod 4	Mod 5
<b>Activities</b>	4.48	4.75	5.00	4.80	5.00
<b>Activity Guides and Alternate Activities</b>	4.25	4.00	5.00	4.40	5.00
<b>Handouts</b>	4.48	4.50	4.67	4.80	5.00
<b>Video clips</b>	4.87	5.00	5.00	5.00	5.00

\*Based on a scale of 1-5 where “5” is the highest possible rating

### NC B-K Consortium CONNECT Workshop Discussion Board

By CONNECT Team

The recent CONNECT workshop at the NC B-K consortium was a terrific way to dive deeper into using the modules. The CONNECT team so much enjoyed meeting everyone and hearing people who have used the modules share their experiences. Let's keep the conversation going!
